Case Study

Enterprise-Grade Medical Training Management Solution

Business Challenge

The client wanted a complete on-line medical training management solution. Client wanted an enterprise-grade medical training management solution for academic hospitals, clinical programs, medical schools and governmental public health agencies of all sizes. The client wanted to use patented on-line technology to allow residency, fellowship and medical school programs the freedom to Design their own evaluations, Assign their own evaluations, and Review their own evaluations.

JIVA's Solution

- Resident/Fellow/Student demographics and portfolios
- Design custom evaluations/quizzes through the Internet
- Assign evaluations without integrating a cumbersome schedule
- Generate on-line reports
- Export all data instantly

Business Result

Saved time: A program coordinator or administrator can custom design and assign a new evaluation in less than 15 minutes. Once evaluations are submitted, an administrator can generate instant reports.

Save employee resources: No additional data entry is required from the administrator or an assistant. The evaluator completes the evaluation and enters the data at the same time.
