

7 reasons to upgrade from Dynamics AX to Microsoft Dynamics 365 F&O

Upgrading from Dynamics AX to Microsoft Dynamics 365 F&O offers you state-of-the-art features and functionalities, integrated business operations, updated user experience, and enhanced business intelligence.

COST OF OWNERSHIP

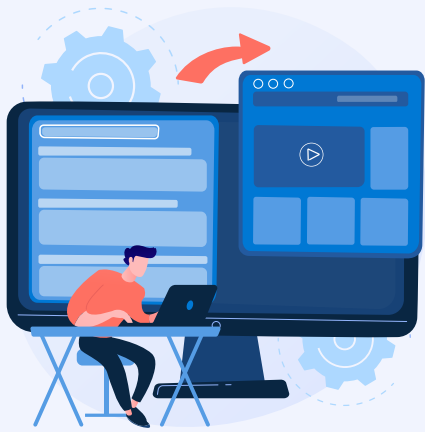

With Microsoft Dynamics 365 Finance & Operations, companies only have to pay for the user licenses. Unlike with Dynamics AX, Dynamics 365 F&O users save on IT infrastructure, maintenance, operational expenses and more.

CLOUD SECURITY

Microsoft Dynamics 365 F&O comes with higher security features. It protects data with its cloud service infrastructure and robust built-in security features. Further more, Dynamics 365 F&O offers efficient data access and collaboration with data integrity and privacy.

USER EXPERIENCE

With Microsoft Dynamics 365 F&O, you can manage tasks from any location at any given time. The advanced, user-friendly interface reduces training time and makes managing operations faster.

FEATURES

Microsoft Dynamics 365 F&O has various additional features and functionalities that are not available on Dynamics AX. Furthermore, novel features are being added every now and then, along with additional apps for meeting specific requirements.

INTEGRATION

Unlike AX, Microsoft Dynamics 365 F&O brings all the business processes in one place. It can be integrated with CRM, Office 365, and other Microsoft products and third party tools.

BUSINESS INSIGHTS

One of the most important value addition to Microsoft Dynamics 365 F&O compared to AX is Power BI. It enables you to leverage important data and generate reports in a flash. In addition, Power BI helps you connect all your applications securely and allows you to have all your data under one roof with an easy-to-use dashboard.

INCREASING AGILITY

Microsoft Dynamics 365 F&O has revolutionized the way you manage daily tasks and your customer data. You can now start working with a centralized database that dissolves barriers between business platforms.
